

# GUARANTEES OF ORIGIN

## 100% RENEWABLE ENERGY

**Customer** Sparebanken Møre

**Guarantee period** 2023

**100 % Renewable energy** Hydropower

**Volume** 2684 MWh

This guarantee certifies that the electricity we supply to the customer is covered by renewable energy sources in its entirety and that it covers all main energy consuming activities in the company such as for instance Production, Lighting, Cooling and Heating.

The electricity is delivered by Wattn AS and will be covered with hydroelectric power.

Wattn AS, 01.01.2024

Thomas Haram  
CEO, Wattn

Wattn AS is handling the documentation which certifies that the delivered electricity originates from hydroelectric power. The electricity's origin is documented with Guarantees of Origin, a system that shows which power plants produce and deliver into the power grid the energy volume that Wattn AS delivers to its customers. The Guarantees of Origin are issued and redeemed within the Norwegian system for Guarantees of Origin, operated by Statnett SF in accordance with the Energy Act § 4.3 and the EU Directive 2001/77/EC on the promotion of electricity produced by renewable energy sources. Electricity production and issuing of Guarantees of Origin can be audited according to normal auditing practice. More information can be found on [necs.statnett.no](https://necs.statnett.no).
